Chronic Respiratory Disease

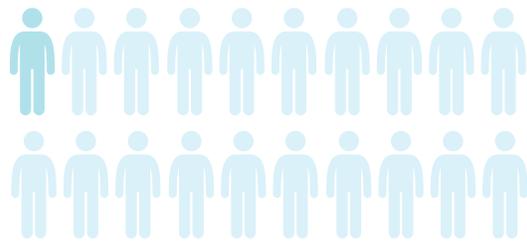

A GLOBAL PUBLIC HEALTH ISSUE

Chronic respiratory disease is the **3rd** leading cause of death globally.

1 in 20

people suffer from chronic respiratory disease globally.

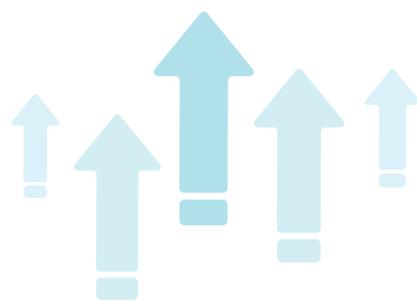

A **lack of skilled staff** to care for the growing number of patients requiring specialized respiratory care is compromising patient outcomes.

4 Million

people die prematurely from chronic respiratory disease each year.

Deaths due to CRDs have increased by as much as **39%** since 1990.

Simulation is an effective way to improve patient outcomes.

The **morbidity** and **mortality rates** associated with **chronic respiratory diseases (CRDs)** are on the rise, indicating an escalating healthcare challenge. This trend underscores the urgency for **enhanced preventive measures, improved treatment protocols, and heightened public awareness** to mitigate the impact of CRDs on individuals and communities.
